

Ritika -

Web Developer

I'm a Web Developer skilled in HTML, CSS, JavaScript, React, and Firebase, currently expanding **expertise in QA testing**. Completing software testing studies with practical experience in manual and automated testing using tools like Selenium. Committed to continuous learning and leveraging emerging technologies and best practices to build high-performing, user-centric digital solutions.

PERSONAL PROJECTS

Eventopia (10/2024 - 12/2024)

- Built a community event platform using React and Firebase, incorporating user authentication, real-time event updates, Google Maps API integration, and Selenium-based automated testing for quality assurance.

BrunetBags (E-commerce) (10/2024 - 11/2024)

- Developed an online bag store with React and Firebase for product listings, cart functionality, secure checkout, and integrated payment APIs.

FoodHub (06/2024 - 08/2024)

- Created a restaurant review platform using React and integrated user-generated reviews and rating features.

Blog (03/2024 - 05/2024)

- An engaging blog hub featuring user comments and social sharing, utilizing React and Firebase for storing and retrieving posts.

Online movie ticket service (12/2023 - 02/2024)

- Developed a seamless ticket booking system with React front-end and Firebase back-end.
